

THE CUBE V5

The Cube is a compact, portable, turnkey unit that projects an interactive gesture-controlled display onto a floor or wall for high impact entertainment, brand promotion and unique immersive experiential environments. The display scales from 100" to 120" and beyond diagonally. The system comes with over 75 eye-catching special effects environments and games, which can be controlled with simple hand, foot, and body gestures. The Cube draws people in and keeps them engaged as they become absorbed in the themes being displayed. A variety of applications can be used to either help participants get active and stimulate their senses, or to create calming ambient environments.

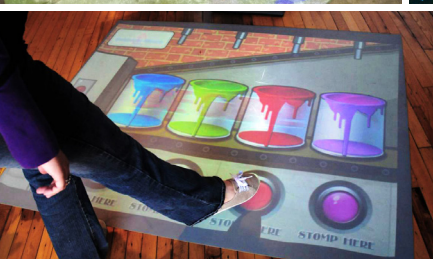

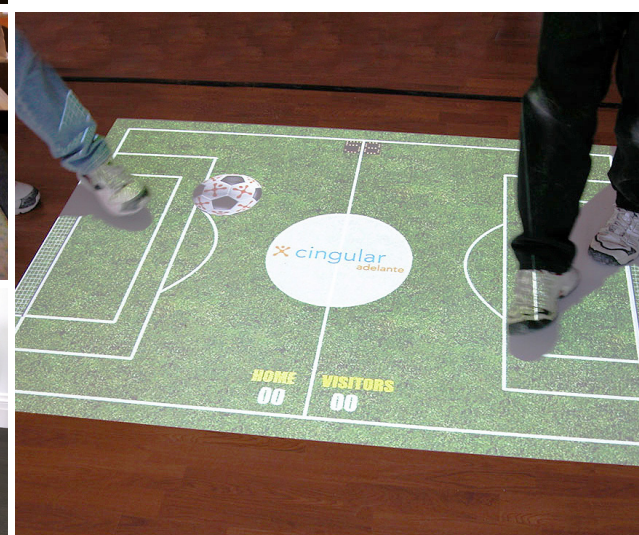

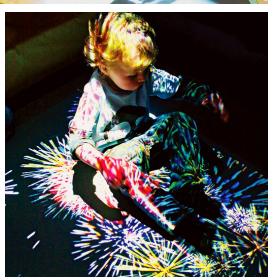

DURABLE, ROBUST, RELIABLE

The Cube is a state-of-the-art build with all components contained inside a light metal case measuring approximately 19" x 12" x 28" with a native screen resolution of 1280 x 800. The projection is 3300 lumens, displaying a very bright and high contrast ratio of 10,000:1. The Intel® core i5 processor with 4GB RAM supports any combination of interactive images, sounds, videos, and animations.

UNLIMITED MARKET APPLICATION

The Cube has unlimited market applications and is the perfect, cost-effective solution for retail spaces, trade shows, special events, and location-based entertainment facilities. If you are a system integrator, exhibit fabricator, or an agency specializing in advertising, marketing, special events or promotions, the portable Cube is for you. The Cube's touch free interaction also makes them perfect for sensory rooms as well as foyers, waiting rooms, and wards of hospitals and clinics.

The Cube V5 was a product finalist for the 2009 Digi Award for the Best Product Design.
The Cube Interactive floor was nominated for its sleek design and portability.

THE CUBE v5

PROJECTOR

Model	Epson WXGA 3 LCD Ultra Short Throw Projector
Brightness (Lumens)	3300 ANSI
Contrast Ratio	Up to 10,000 : 1
